Zack,

Having been a teacher many years ago, I'm very impressed with the way you have everything organized. You provide not only written instructions but video as well to reinforce what your students have read. All of the supplemental materials were also very easy to download. I appreciate all the work you put into this project and the price you charge for everything is more than fair. In fact, I think I'm getting more than my money's worth. Thank you so much.
